## FEATURES

**MARC Uronic Salt Remover** removes uric acid salt deposits in urinals and drains, and helps keep them free-flowing. It is formulated with Acid Replacement Technology, which replaces traditional mineral and organic acids such as hydrochloric, phosphoric, sulfamic, citric and glycolic acids with a low pH organic salt. **MARC Uronic Salt Remover** dissolves deposits with a performance similar to that of hydrochloric acid and superior to phosphoric acid and organic acids without harsh vapors or fumes. It is non-regulated by the Department of Transportation, being classified only as a mild irritant. It is completely soluble in water, and contains no phosphates or Volatile Organic Compounds (VOCs), and is a low contributor to BOD and COD in sewage effluents. It may also be used to clean other surfaces in bathrooms and restrooms such as showers, sinks, tubs, toilet bowls and fixtures.

## DIRECTIONS FOR USE

**Drains:** Pour 8 to 16 ounces down urinal drain. For maintenance use, pour 4 ounces down drain each week.

**For Showers, Sinks, Tubs and Fixtures:** Apply full strength. Allow to set for 3 to 5 minutes, and then wipe off. Wash off thoroughly with water.

**For Toilet Bowls:** Apply full strength, and allow to set for 3 to 5 minutes. Swab bowl and flush. For extremely scaled surfaces, a second application may be necessary.

**NOTE:** Always test on an inconspicuous area first. Do not use on polished marble surfaces. Always rinse surface.

**CAUTION:** Contains a low pH organic salt. May cause eye and skin irritation. If eye contact occurs, flush with water for 15 minutes and get medical attention if irritation persists. If skin contact occurs, flush off with water. If swallowed, do NOT induce vomiting. Drink a glass of water and get medical attention. If mists are inhaled, get fresh air.

**KEEP OUT OF REACH OF CHILDREN!**
