

- ★ NON-VOLATILE ★ NONFLAMMABLE ★
- ★ A SUPERIOR WETTING AGENT ★

MARC SATURATE Concentrated Wetting Agent is a special formulation of chemical compounds designed to aid in increasing the effectiveness of herbicides and fertilizers. When used as directed, **MARC SATURATE** will increase the performance of herbicides by encouraging fast, deep penetration of the weed killer into the plant. This not only results in a quick kill of the plant, but also drastically reduces expensive loss of the herbicide due to evaporation. Because of the rapidness and depth of penetration caused by **MARC SATURATE**, the herbicide is absorbed by the plant in a fraction of the time it normal would be, thus decreasing the "lay time" of the herbicide on the plant and, of course, the exposure to the sun and wind. When using **MARC SATURATE** Concentrated Wetting Agent, the user will realize a more even distribution of the herbicide, reducing the costly expense of re-spraying the area. The use of **MARC SATURATE** will extend the effectiveness of the herbicide, giving increased coverage. **MARC SATURATE** also enhances the soil penetration of fertilizers.

WARNING: Eye and skin irritant. May be harmful if swallowed. Wash thoroughly after handling. Wear protective gloves and eye protection. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. If on skin: Wash with plenty of water. Take off contaminated clothing and wash before reuse. If skin irritation occurs: Get medical attention. If swallowed: Do NOT induce vomiting. Get immediate medical attention.

HMIS/NFPA Ratings: Health-0, Flammability-0, Reactivity-0.

MADE IN USA.

Concentrated Non-Ionic Wetting Agent

≡SATURATE≡

Specially Formulated for Herbicide Application

- ★ LOWERS HERBICIDE COST
- ★ INCREASES EFFECTIVENESS
- ★ EXTENDS COVERAGE
- ★ REDUCES EVAPORATION LOSS

WARNING: Irritant. See precautions on left panel. Keep Out of Reach of Children!

An Exclusive Formula of **M-19**

- ★ Phosphate Free ★ Biodegradable ★
- ★ Organic Concentrate ★

MARC SATURATE Concentrated Wetting Agent is a biodegradable product. This means that the ingredients are broken down into simpler compounds by biological action. Therefore, **MARC SATURATE** helps to eliminate suds and foaming problems in our lakes and streams.

MARC SATURATE Concentrated Wetting Agent contains no sodium ion, consequently, this product will not contribute to the salting of the soil.

MARC SATURATE Concentrated Wetting Agent is a phosphate-free organic concentrate designed for the exclusive purpose of aiding in the application of herbicides and fertilizers. This product has a pH range of 7.2 to 8.2 and therefore will not harm soils or desirable plants.

USE DIRECTIONS

When using **MARC SATURATE** Concentrated Wetting Agent with a herbicide, dilute at the rate of 1 pint concentrate to 250 gallons of herbicide mixture. When using **MARC SATURATE** Concentrated Wetting agent with liquid fertilizers, dilute at the rate of 1 quart concentrate to 250 gallons of fertilizer mixture. At these dilutions **MARC SATURATE** aids in producing a more even spray and will keep nozzles clean and reduce clogging.
