

TECHNICAL DATA SHEET

Product Name: MARC DOOMSDAY+

Product Number: MARC 20

MARC DOOMSDAY+ is a concentrated powerful three-way, post-emergent herbicide that provides control of 225 annual and perennial broadleaf weeds in both warm- and cool-season turfgrasses in an easy-to-use liquid formulation. When sold in quart containers, **MARC DOOMSDAY+** is not a restricted-use product requiring a license in Texas.

Controls:

Black Medic, Clover, Chickweed, Dandelion, Henbit, Knotweed, Oxalis, Plantain, Thistle, Spurge, Wild Onion and many other species of weeds listed on the label.

For Use On: Grounds, Lawns, Commercial Establishments, Schools, Hospitals, Nursing Homes, Parks, Airports, Roadsides, Picnic Areas, Athletic Fields, Cemeteries, Golf Courses, Churches, Farms

Usage Rate: About 1 fluid ounce in one gallon of water to cover 1,000 square feet, or 3 pints in 40 gallons of water per acre. See label for complete use directions.

Features & Benefits:

- 3 unique modes of actions
- Offers lower use rates
- Integrated faster control (5 to 7 days) of Clovers, Dandelions, Ground ivy, Plantains, Spurges, Wild violets, Speedwell and many more
- Safe to use on major turfgrass species

Mode of Action: Absorbed by roots and foliage, and translocates to interfere with plant growth and cellulose production. Moves both upward and downward to growing points of the roots and shoots.

State Restrictions: Arkansas, New Mexico, Texas – license required to sell and use 1-gallon containers; not available in Arizona in any size.

Product Specifications:

Active Ingredients:	40% 2,4-D 4; 21% Dicamba; 3.3% Quinclorac
Appearance:	Dark amber water-based liquid
Odor:	Mild amine
pH:	8.48
Specific Gravity:	1.155 @ 25°C
Weight per Gallon:	9.64 pounds @ 25°C
Viscosity:	11.3 cSt @ @ 25°C
Typical Use Rate:	About 1 fluid ounce in one gallon of water to cover 1,000 square feet
Available Sizes:	Quarts and Gallons ONLY
