

TECHNICAL DATA SHEET

Product Name: TRIPLE SELECT

Product Number: MARC 30

Description: MARC 30 Triple Select is a concentrated selective weed killer for use on grass. It contains a combination of three powerful selective herbicides to control a broad spectrum of hard-to-kill broadleaf weeds. Triple Select does not harm good, desirable grasses.

Contains: Non-volatile 2,4-D Amine for broadleaf weed control without evaporation, Mecoprop-p which is a selective translocated herbicide for clover and other weed control and Dicamba which is a selective, translocated pre- and post-emergent weed killer. M-30 contains a purified form of Mecoprop-p known as the optical isomer, which is the portion of the molecule active as a herbicide

Key Weeds Controlled: Black medic, buckhorn, clover, dandelion, knotweed, lambsquarter, lespedeza, pigweed, plantain, poison ivy, ragweed, spurge, wild garlic, yarrow (see label for complete list).

For Use On: Turf, parks, cemeteries, athletic fields, golf courses (including fairways, aprons, tees and rough), rights-of-way, other non-crop areas.

Product Specifications:

| | |
|---------------------|---|
| Active Ingredients: | 2, 4-D: 30.56% |
| | Mecoprop-p: 8.17% |
| | Dicamba: 2.77% |
| Other Ingredients: | 58.50% |
| Appearance: | Clear dark amber liquid |
| Odor: | Phenolic |
| pH: | 8 |
| Weight per Gallon: | 9.6 pounds |
| Typical Use Rate: | 1.5 ounces per gallon of water |
| HMIS Ratings: | Health-2; Flammability-1; Reactivity-0. |
