

## DISSOLVES:

• GREASE • FAT • SLIME •

## DIRECTIONS

MARC "A" Team Lift Station Cleaner and Deodorizer is designed specially to dissolve grease and slime in lift stations, sewage treatment plants, cesspools, grease traps, drainage fields and sludge aeration beds, while leaving a pleasant citrus fragrance.

LIFT STATIONS: To be poured directly into manhole or lift station pit. If there is a heavy accumulation on side walls of manhole or lift station pit, MARC "A" Team Lift Station Cleaner and Deodorizer should be poured or sprayed through a MARC Pressure Sprayer (Hudson type) directly onto side walls. MARC "A" Team Lift Station Cleaner and Deodorizer is an orange terpene-based product, and will float on top of water. For best results it should be used in sufficient quantities to assure a one to three inch cap on the surface. If the buildup of grease and sludge in the lift station is severe or badly encrusted, it may be necessary to physically remove the buildup, and then use MARC "A" Team Lift Station Cleaner and Deodorizer on a maintenance basis to keep the buildup from reforming.

FORMULA TO DETERMINE AMOUNT OF MARC "A" TEAM TO BE ADDED TO LIFT STATION—

ROUND LIFT STATION: Diameter in FEET x Diameter in FEET ÷ 2 x Depth of Cap in INCHES = Gallons of MARC "A" Team required.

RECTANGULAR OR SQUARE LIFT STATION: Length in FEET x Width in FEET x Depth of Cap in INCHES x 0.6 = Gallons of "A" Team required.

SEPTIC TANKS & CESSPOOLS: Add one pint per 500 gallon capacity for initial treatment. Use one to two ounces per week for each 500 gallon capacity as a preventive maintenance treatment.

DRAINS: Pour one-half cup (4 oz.) of MARC "A" Team into drains. Allow to remain overnight, if possible - at least two to four hours. DO NOT ALLOW LIQUID OR VAPORS OF LIQUID TO COME IN CONTACT WITH FOOD. MADE IN USA.
