

## TECHNICAL DATA SHEET

**Product Name: VEG-A-KILL PLUS 2,4-D**

**Product Number: MARC 60**

**Description:** MARC 60 Veg-A-Kill Plus 2,4-D is a ready-to-use herbicide designed for application to areas where all vegetation is to be killed. It is a non-selective weed killer, and residual control will last for up to a growing season (or more), avoiding costly hand weed cuttings and/or several weed killing applications. This high-performance herbicide is a triple kill formula – contact kill, top kill, and root kill. The phytotoxic oil carrier combines the properties of low volatility with rapid penetration, absorption, and translocation of the active ingredients to produce rapid browning and contact kill. The 2,4-D provides systemic kill by forcing the plant to outgrow itself. The Bromacil, once in the ground, will kill the roots and prevent any new weed growth. The insolubility of Bromacil in water maximizes the effect regardless of rainfall after application or stage of growth at time of application. This product may be applied at any time of the year when weeds are growing. Plant growth will be controlled for an extended period of time, depending upon application volume and soil consistency. Care should be taken to avoid spray drift to contact desirable vegetation. Apply 1 gallon per 1,000 square feet (40 gallons per acre); do not dilute.

### Product Specifications:

Active Ingredients:	1.09% Isooctyl (2-ethylhexyl) Ester of 2,4-D 0.98% Bromacil
Inert Ingredients:	97.93% (contains petroleum distillates and other solvents)
Classification:	Liquid herbicide
General Appearance:	Clear liquid
Color:	Red
Odor:	Aromatic solvent
Weight per Gallon:	7.3 pounds
Specific Gravity:	0.875
Flash Point:	145°F
Solubility in Water:	None
Viscosity, Kinematic:	<20 cSt
VOC Content:	>90%

Rev. 1019
