Specially Formulated for Hard Water with  
**Deep Cutting Wetting Agents**

**MARC High Pressure Cleaner** is a blend of special surfactants and wetting agents to give deep penetration that will readily solubilize dirt and grease. **MARC High Pressure Cleaner** also contains ingredients to offset hard water problems and eliminate salting out which is prevalent in many high pressure cleaners, and causes nozzle clogging.

### DIRECTIONS

**MARC High Pressure Cleaner** should be diluted at a ratio of 1 quart to 50 gallons of water (1:200). For extremely dirty or greasy surfaces a stronger concentration may be used.

**MARC High Pressure Cleaner** may also be used as a "soak" solution. Use 6 to 10 ounces per gallon of warm or hot water and let soak until encrusted and greasy materials loosen, and then rinse.

**Net Contents: 5 Gallons** RM06-15
