

FEATURES

MARC Enzyme Block is a slow-dissolving solid cylinder of enzyme-producing bacteria which break down and control organic wastes such as greases, fats, oils and sludge, and also help control odors. Each block contains trillions of specially selected naturally-occurring bacteria to handle difficult waste problems.

MARC Enzyme Blocks are easy and economical to use. The slow-dissolving blocks provide continuous automatic dosing, eliminating the need and expense of equipment or operator action.

MARC Enzyme Blocks function under a wide range of pH conditions from as low as 5 and up to 9.5, and a temperature range of 45° to 120°F. Depending on the flow rate, each block will last from 30 to 90 days.

Applications for **MARC Enzyme Blocks** include waste water plants, holding tanks, lift stations, sewers, drains, wet wells, lagoons, grease traps and car wash pits. They reduce sludge buildup, enhance BOD/COD levels, help reduce hydrogen sulfide and other odors at their source and increase system efficiency. **MARC Enzyme Blocks** function under both aerobic and anaerobic conditions to break down even resistant types of grease.

HMIS/NFPA Ratings: Health-1, Flamability-0, Reactivity-0. **MADE IN USA.**

MARC Enzyme Blocks are completely biodegradable, and contain no harmful chemicals, acids or caustics. The compact size allows for easy storage and handling. Regular use of **MARC Enzyme Blocks** will keep systems free flowing, free from the buildup of organic wastes, help prevent system backups, eliminate excessive pumping and reduce the impact on downstream collection systems.

DIRECTIONS FOR USE

Remove the **MARC Enzyme Block** from box, but leave in mesh bag. Hang mesh bag from a hook or tie to a rope so the block makes contact with the waste water. Replace block when it has dissolved. Store **MARC Enzyme Blocks** in a cool, dry area above 45°F.

WARNING: Causes skin irritation and serious eye irritation. Wear protective gloves and eye protection. Wash skin thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. **FIRST AID--** Eye Contact: Rinse thoroughly with plenty of water; also under the eyelids. If symptoms persist, call a physician. Skin Contact: Wash with plenty of soap and water. If skin irritation or rash occurs, get medical attention. Wash contaminated clothing before reuse. Ingestion: Rinse mouth immediately and drink plenty of water. Never give anything by mouth to an unconscious person. Dispose of in accordance with federal, state and local regulations. **KEEP OUT OF REACH OF CHILDREN!**
