

NON-TOXIC ◦ NON-CORROSIVE ◦ NON-CAUSTIC

MICRO-ZYME

BACTERIAL ENZYMES

★ MINIMUM 5 BILLION COLONIES PER GRAM ★

SPECIALLY DESIGNED FOR:

- Sinks • Septic Tanks • Grease Traps • Drain Lines •

CAUTION: KEEP OUT OF REACH OF CHILDREN!

See other precautions on back panel.

Net Weight: 16 ounces (1 pound)

An Exclusive Formula of **M-99**

MID-AMERICAN RESEARCH CHEMICAL CORP.

MICRO-ZYME contains billions of specially formulated aerobic and anaerobic bacteria and enzymes which will promote natural digestion of waste in household sewage. This digestion reduces and liquefies organic waste which normally causes problems in drain lines and septic tanks. Regular use of **MICRO-ZYME** helps to reduce waste problems in these areas. **MICRO-ZYME** does not contain acid, lye or similar caustic materials. It will not harm pipes or porcelain.

MICRO-ZYME contains the four basic families of enzymes necessary for the digestion of organic wastes:

1. Protease enzymes - work on proteins.
2. Diastase enzymes - work on carbohydrates, starches and sugars.
3. Lipase enzymes - work on fats and grease.
4. Cellulase enzymes - work on cellulose.

All cooked or canned foods and almost all other processed foods have completely eliminated enzymes and bacterial counts in order to keep or preserve such foods. Because of this, it is necessary to use **MICRO-ZYME** to replace these destroyed enzymes and bacteria and re-establish the normal balance of nature. **MICRO-ZYME** not only replaces but accelerates natural bacterial activities to bring about the digestion of organic wastes.

DIRECTIONS

SEPTIC TANKS: Use ½ pound of **MICRO-ZYME** for each 1,000 gallon capacity, mixed with one quart of lukewarm water, and flushed through a toilet. To maintain bacterial action at a high level, add one tablespoon every one to two weeks.

GREASE TRAPS: Use four tablespoons of **MICRO-ZYME** in two cups of lukewarm water, and pour directly into the grease trap. Results should be noticed in two weeks. Repeat application every 4 to 6 weeks.

SINKS OR DRAIN LINES: Use one tablespoon of **MICRO-ZYME** in one cup of lukewarm water, and pour directly into line. Repeat application every 3 to 4 weeks.

CAUTION: May cause irritation. Avoid eye and excessive skin contact. Flush thoroughly with water if contact occurs. Do not take internally. Keep product dry before use. Keep container closed.

MADE IN USA.
