**NO Chlorinated Solvents (NO 1,1,1-Trichloroethane)
(NO Perchloroethylene) (NO Methylene Chloride)**

PENETRATES through rust and scale to loosen parts which have been frozen by corrosion.

LUBRICATES parts to ensure free and easy movement.

DEMOISTURIZES and creates a waterproof film that dries out electrical equipment, inhibits corrosion and prevents electrical discharge. Electronic Cleaners do not contain more than 75% VOC.

PROTECTS and creates a non-drying film that seals parts against atmospheric and mild chemical corrosion.

DIRECTIONS:

TO REMOVE CORROSION: Spray liberally directly on to dirt and scale. Allow to penetrate. Remove loosened scale, then reapply to leave an anticorrosive coating.

TO DISPLACE MOISTURE: Spray electrical equipment until thoroughly saturated. Allow to penetrate before attempting to restart, then re-apply to protect surface.

TO LOOSEN FROZEN NUTS AND BOLTS: Apply liberally to frozen nuts and bolts, hinges and sliding and rotating parts. Allow to penetrate into threads. Work parts back and forth, then re-apply to leave a never-dry, protective lubricating film.

TO ENSURE ADEQUATE PROTECTION REAPPLY PERIODICALLY
