

## TECHNICAL DATA SHEET

**Product Name:**           **GRAPHITE LUBRICANT**  
                                  **HIGH TEMPERATURE DRY FILM LUBRICANT**

**Product Number:**       **MARC 127**

**Features:** A high temperature and extreme pressure lubricant. Stops rust on parts in storage by forming an impenetrable rust-proof barrier to protect against corrosion. Micro-sized film assures machining tolerances.

Weight Per Gallon:	7.26 pounds
Specific Gravity:	0.87
Flash Point:	-156°F (of propellant); graphite is non-flammable
Color:	Black fluid; leaves graphite film
Working Temperature Range:	-75°F to +800°F
Odor:	Mild solvent
Soluble In Water:	Slight
Storage Stability:	Excellent
