

TECHNICAL DATA SHEET

Product Name: MOSQUITO REPEL

Product Number: MARC 132

MARC 132 Mosquito Repel is an EPA registered insect repellent. It contains 22.56% DEET (N,N-diethyl-m-toluamide) plus an additional repellent (N-Octyl bicycloheptene dicarboximide) and synergist (Di-n-propyl Isocinchomeronate) to enhance the potency of the DEET and thus provide outstanding repelling action. These three active ingredients work together to constitute a broad-spectrum insect repellent that is more effective, lasts longer and absorbs less into the skin than straight DEET formulas. **MARC Mosquito Repel** repels mosquitoes, biting flies, chiggers, ticks, and other flying insects including fleas on exposed skin. It even repels mosquitoes which may carry diseases such as Zika Virus, West Nile Virus and Encephalitis. The unique valve system allows user to spray **MARC Mosquito Repel** in any direction. The non-oily formula will not stain clothing, and the handy 8 oz.-size can is easy to carry. The can sprays right-side up or upside down.

Excellent For: Utility Workers, Lawn Maintenance Professionals, Construction Workers, Campers, Golfers, Athletes, Hunters and Other Outdoor Enthusiasts.

Product Specifications:

Form: Aerosol spray mist
Fragrance: DEET
Color: Clear, light amber
Specific Gravity: 0.85 to 0.89
Weight per Gallon: 7.1 to 7.4 pounds
Solubility in Water: Partial
Repellent Time: Up to 8 hours
Net Weight per Can: 6.5 ounces

Rev. 0523
