

- EASILY APPLIED
- DRIES QUICKLY
- PROLONGS CARPET LIFE
- PLEASANT FRAGRANCE

#### FEATURES

**MARC Defender Carpet Protector** is an easily applied liquid that makes carpets soil and stain resistant. Dust, dirt and grime find it hard to stick to a carpet treated with **MARC Defender Carpet Protector**. Regular use in high traffic areas, such as entry ways, reduces the soiling and keeps these areas looking better longer with less maintenance required. **MARC Defender Carpet Protector** dries quickly with no solvent odor and little risk of damage to furniture or woodwork. It contains no flammable solvents, and is stable when stored.

**WARNING:** Contains mixed surfactants. Causes serious eye irritation. Avoid contact with eyes and prolonged contact with skin. Wear eye protection. If on skin: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. Do not take internally. Do not allow product to freeze.

- SOIL & STAIN RESISTANT
- FORMS INVISIBLE SHIELD
- RETARDS ABSORPTION
- NON-FLAMMABLE

#### DIRECTIONS

NOTE: Test product first on a small, inconspicuous area to determine that the carpet will not be harmed.

Before using **MARC Defender Carpet Protector**, it is essential that the carpet be cleaned to prevent dirt from being sealed in. Do not apply to heavily soiled carpet. Apply to the carpet with a pressurized sprayer. The carpet should be uniformly wet, but not saturated. The natural "wicking" action of **MARC Defender Carpet Protector** on the fibers allows for penetration deep into the fiber face, providing resoil resistance below the actual wear surface where soil normally accumulates.

The coverage of **MARC Defender Carpet Protector** is approximately 650 to 1,000 square feet per gallon. This may vary depending on the method of application and pile density. The frequency of application will also vary depending on the traffic intensity and local weather conditions. RM06-15
