

TECHNICAL DATA SHEET

Product Name: CITRUS CONCRETE CLEANER

Product Number: MARC 222

Description: M-222 Citrus Concrete Cleaner is a highly concentrated water-soluble powdered degreaser and cleaner which is designed for use on concrete and a wide variety of other washable surfaces. This super heavy-duty product quickly emulsifies grease build-up and tough grime. It is safe to use on any surface not damaged by water, including wood, plastics, metals and painted surfaces. M-222 is biodegradable, non-toxic, non-corrosive and non-caustic for added safety. Color changes from an orange powder to lime green in solution.

Formulation: High phosphate formula containing non-ionic and anionic surfactants and detergents with extra grease cutters, water softeners, and all-natural citrus extract.

Application:

This heavy-duty concrete and equipment cleaner should be used as follows:

Heavily Soiled Concrete – Wet floor with clean water, then sprinkle the detergent directly onto soiled areas. Scrub with a stiff broom and rinse with clean water.

Lightly Soiled Concrete – Use 2 to 4 cups of M-222 per 5 gallons of water. Swab onto surface, allow to penetrate, and scrub with a stiff broom. Rinse with clean water.

General Cleaning - Use ½ to 2 cups of M-222 per 5 gallons of water. Sponge, mop, or spray solution onto surfaces to be cleaned. Longer soak times or mild scrubbing action will facilitate soil removal.

Soak Tank Degreasing – Use ½ - 1 pound per gallon of water. Hot water will provide ideal cleaning conditions. Cleaning will be faster in agitated tanks and when fresh solutions are used.

Product Specifications:

Form.....Granular
Color (of Powder).....Orange
Color (in Solution).....Lime Green
Storage Stability (at 70°F).....Indefinite
Density.....0.84 g/ml
pH of 10% Solution.....12.50±0.05

Foaming Properties.....Low
Solubility (in water).....10.0% in Water
Odor.....Citrus
Phosphates (as % P₂O₅).....18.10
% Active Ingredients.....88.0

R0821
