MID-AMERICAN RESEARCH CHEMICAL CORP.
P.O. BOX 927 COLUMBUS, NE 68602-0927

FEATURES

MARC Bio-Zyme Cleaner/Spotter is formulated from a combination of bacteria and cleaners for spot cleaning as well as for deodorizing.

MARC Bio-Zyme Cleaner/Spotter contains unique bacterial strains to break down the sources of odors in carpet fibers and in fabrics, and to enzymatically digest residual soils. It also contains a special blend of high foaming detergents, emulsifiers, anti-resoiling agents, optical brighteners and deodorizers to surround, penetrate, lift and remove stains and spots, leaving a clean, fresh smelling area. **MARC Bio-Zyme Cleaner/Spotter** is also an excellent heavy traffic area cleaner for carpets. Also use as a pre-spotter on clothing.

The soil encapsulators in **MARC Bio-Zyme Cleaner/Spotter** dry to a non-tacky powder for easy removal, without resoiling. The optical brighteners enhance the appearance of the surface.

MARC Bio-Zyme Cleaner/Spotter works on odors and stains caused by spills, mold, mildew, ketchup, mustard, lipstick, vomit, urine, dampness and other organic matter.

MARC Bio-Zyme Cleaner/Spotter is a phosphate-free, neutral, noncorrosive, non-flammable, biodegradable, low VOC product which is safe on most fabrics not affected by water, including new stain-resistant carpeting.

For use in schools, hospitals, nursing homes, prisons, hotels, motels, offices, kennels, etc.

DIRECTIONS FOR USE

NOTE: For best results, treat stain immediately after occurrence.

1. Pre-test on an inconspicuous area to determine colorfastness.
2. Remove any excess soil or spillage.
3. Spray spot or problem area with **MARC Bio-Zyme Cleaner/Spotter** until covered with dense foam.
4. Agitate area with a brush and blot with a clean, damp white cloth or towel, working toward the center of the stain. For stubborn areas, allow product to work for 5 to 10 minutes before blotting.
5. Allow treated area to dry, then vacuum or launder.

CAUTION: Contains anionic detergent. May cause eye irritation. Avoid eye and skin contact. Avoid contact with open wounds. Do not take internally. If eye or skin contact occurs, flush with water for 15 minutes. Get medical attention if irritation persists. If swallowed, drink one or two glasses of milk or water. Do not induce vomiting. Get medical attention.

KEEP OUT OF REACH OF CHILDREN!

Keep container closed when not in use. Store away from extremes of hot or cold.
