FEATURES

MARC Carpet Defoamer is especially formulated to reduce foam build-up in recovery tanks used with steam and hot water extraction carpet cleaning and wet vacuuming.

When deep cleaning carpeting, soils and residual high foam detergents from previous shampoos may cause excessive foaming in the recovery tank. This puts extra strain on equipment, and necessitates more frequent emptying of the tank. Use of **MARC Carpet Defoamer** will help eliminate foam and thus reduce equipment problems and save on labor costs.

DIRECTIONS

Add one to two ounces per gallon, as required to the liquid recovery tank of extraction shampooers and wet vacuums.

CAUTION

May cause eye irritation. If eye contact occurs, flush thoroughly with water. Do not take internally.

KEEP OUT OF REACH OF CHILDREN!
