• GREASE • FAT • SLIME •

## DIRECTIONS

**MARC Purple Power Lift Station Cleaner** is designed specially to dissolve grease and slime in lift stations, sewage treatment plants, cesspools, grease traps, drainage fields and sludge aeration beds, while also suppressing odors.

**LIFT STATIONS:** To be poured directly into manhole or lift station pit. If there is a heavy accumulation on side walls of manhole or lift station pit, **MARC Purple Power Lift Station Cleaner** should be poured or sprayed through a MARC Pressure Sprayer (Hudson type) directly onto side walls. **MARC Purple Power Lift Station Cleaner** will float on top of water. For best results it should be used in sufficient quantities to assure a one to three inch cap on the surface. If the buildup of grease and sludge in the lift station is severe or badly encrusted, it may be necessary to physically remove the buildup, and then use **MARC Purple Power Lift Station Cleaner** on a maintenance basis to keep the buildup from reforming.

FORMULA TO DETERMINE AMOUNT OF **MARC Purple Power Lift Station Cleaner** TO BE ADDED TO LIFT STATION—
