

- **HOLDS MOISTURE**
- **PENETRATES COMPACTED AREAS**
- **PHOSPHATE-FREE**
- **NO SODIUM ION**

For better turf grass, use **MARC Penetrating Soil Conditioner**. It will do the following:

1. **MARC Penetrating Soil Conditioner** penetrates thatched and compacted areas so as to allow water, fertilizer and air to better penetrate into soil.
2. Light applications of **MARC Penetrating Soil Conditioner** to greens prevents dew formation.
3. Seeds treated with **MARC Penetrating Soil Conditioner** germinate faster and better.
4. Treated turf sprayed with **MARC Penetrating Soil Conditioner** is more resistant to wilt.
5. Turf treated with **MARC Penetrating Soil Conditioner** saves watering. There is less run-off and less evaporation.
6. **MARC Penetrating Soil Conditioner** helps develop stronger, deeper and healthier root systems for more beautiful turf.
7. **MARC Penetrating Soil Conditioner** is non-toxic to grasses at recommended rates.
8. **MARC Penetrating Soil Conditioner** is completely soluble in cold water for quick, easy applications.

# PENETRATING SOIL CONDITIONER

- **Organic Soil Improver**
- **Improves Porosity**
- **Non-Toxic to Turf and Plants**

**An organic soil improver which contains non-ionic wetting agents that will help open up dense soils, improve porosity and penetration and encourage deeper, stronger roots of desirable plants. It is non-toxic and will not damage the soil whatsoever. In fact, it will assist in building up soil organic matter, and helps stimulate desirable bacterial decomposition.**

An Exclusive Formula of **M-404**

## DIRECTIONS

**FOR GREENS, TEES, FAIRWAYS AND LAWN AREAS.**

**FOR COMPACTED SOIL & HEAVY THATCHED and MATTED LAWN AREAS**, including slopes, collars, bunkers, approaches, etc., dilute one quart **MARC Penetrating Soil Conditioner** with at least 15 to 25 gallons water and apply to 2,000 to 3,000 square feet. Applications should be made in spring and repeated as required. Check soil sample for depth of moisture content and make repeated applications as required. (Sandy soils require less applications than heavy clay soils.)

**DEW PREVENTION** - To prevent dew formation on greens, dilute one quart **MARC Penetrating Soil Conditioner** with a minimum of 10 gallons water and spray to cover 5,000 square feet. One application will prevent dew formation for a period of 2 or 3 days. Repeated applications are recommended to prevent dew formation and to allow better water penetration on compacted or otherwise hard-to-wet greens.

**WARNING:** Eye and skin irritant. May be harmful if swallowed. Wash thoroughly after handling. Wear protective gloves and eye protection. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. If on skin: Wash with plenty of water. Take off contaminated clothing and wash before reuse. If skin irritation occurs: Get medical attention. If swallowed: Do NOT induce vomiting. Get immediate medical attention. Keep Out of Reach of Children!
