

TECHNICAL DATA SHEET

Product Name: Green Scrub Pad

Product Number: MARC 806

Description: The **MARC 806 Green Scrub Pad** is constructed of polyester fibers in a semi-open texture nonwoven fabrication, and is designed for scrubbing floors. Abrasive particles are dispersed throughout and bonded to the nonwoven construction with a durable adhesive.

Properties:

Property	Value
Thickness	1 inch 26 mm
Weight	40 osy (ounces per square yard) 1,356 gsm (grams per square meter)
Fiber Type	Recycled Polyester
Binder System	Cross-linkable Water-Based
Binder Application	Spray/Dip
Abrasive Application	N/A
Abrasive	N/A
Color	Green
Pack	5 per case

Use: Use this pad with a floor cleaning solution to remove soils. It is ideal for use on floor machines with speeds up to 350 rpm.

Construction: The **MARC 806 Green Scrub Pad** is made of 100% recycled polyester and natural fibers with water based resins. This pad has been designed for use on both sides. Polyester fiber used in our pads comes from 100% post-consumer and industrial recycled waste product. It is formulated to biodegrade in a fraction of the time that it takes conventional floor pads once discarded into an active landfill. Water-based latex resins are used in the manufacturing process. No phenol-formaldehyde resins are used in the binding process. Shipping cartons contain at least 45% recycled material.

Directions for Use: Dust mop or sweep floors prior to scrubbing. Use pad until soil is removed from floor. Pick up cleaning solution with a mop, wet vacuum or automatic scrubber. Rinse floor and let dry prior to recoating or opening to traffic. Polish with a MARC polishing/burnishing pad to achieve a high gloss finish.
