

MICROFIBER DUST MOP

CANVAS-BACKED

This dust mop has all the benefits of microfiber without having to replace standard frames and handles. It has cut-ends with a fringe to pick up larger particles of dust and trash. This **MARC Canvas-Backed Microfiber Dust Mop** electrostatically attracts and holds dust that cotton mops leave behind. No dust mop treatment is required. The envelope-style backing eliminates problems with ties or snaps. Extra padding in the mop allows for complete surface contact.
