- Easily Conforms to Contours & Grooves
- Ideal for Cleaning Stains, Marks, Ink, Crayon, Lipstick, Tea, Coffee, Wine, Soap Scum, Scuffs, Fingerprints, Hard Water Deposits, Rust Spots, Pencil, Carbon Residue, Burn Marks, Etc.

FEATURES:

MARC Power Sponge is an advanced technology product powered by microscopic abrasive qualities in a melamine resin-based sponge. When combined with water, the unique gentle abrasion properties literally erase stains and marks which many chemical-based products may not be able to remove. The addition of the yellow durability strip in the center of the sponge provides stability to maximize both the power and longevity of the MARC Power Sponge. Ideal for use on walls, floors, doors, sinks, tubs, faucets, appliances, glass, vinyl, leather, plastic, brass, chrome, copper—just about any surface.*

DIRECTIONS:

Wet MARC Power Sponge thoroughly with plain tap water and gently squeeze out excess water. Be sure all white surfaces are wet, but do not wring out. Scrub area to be cleaned by applying pressure as needed. Do not over-scrub. Wipe area with a dry cloth to remove any residual water. Rinse MARC Power Sponge with fresh water and wipe white surfaces to remove any build-up of deposits and to extend sponge life. Replace with a new one when white surface becomes worn, misshapen or too soft.

*NOTE

The mild abrasive may alter the appearance of certain soft plastic surfaces as well as painted finishes and wood sealers. If unsure of the effect, always test in an inconspicuous area. The use of this sponge without sufficient water will increase this effect. Not recommended for use on surfaces that are glossy, dark, brushed, satin finishes or aquariums.

Made in USA from foreign and domestic materials.*
