

## PRODUCT SPECIFICATION SHEET

# MARC G-105 Black Nitrile Powder-Free Examination Gloves

**MARC G-105 Black Nitrile Powder-Free Examination Gloves** are the preferred choice of law enforcement agencies, correctional facilities, security firms and fire, ambulance and police departments. Their distinct dark black color stands out and also helps to rapidly identify potentially unsafe light-colored substances.

These gloves are made thicker than most nitrile exam gloves. They can stand up to more rugged and harsh applications in industrial, manufacturing and packaging jobs. They provide superior puncture, tear and chemical resistance, yet with excellent dexterity. They stretch without tearing.

**MARC G-105 Black Nitrile Powder-Free Examination Gloves** are 100% rubber latex-free which eliminates potential allergic reactions to latex protein. The textured surface provides a strong grip for both wet and dry applications.
