SECTION 4: FIRST AID MEASURES

FIRST-AID MEASURES GENERAL: Take off immediately all contaminated clothing. If you feel unwell, seek medical advice. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this sheet where possible. Keep victim warm and rested. Wash contaminated clothing before reuse.

- Rinse immediately with plenty of water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get EYES: medical advice/attention if you are concerned, irritation develops and persists, or if you feel unwell.
- SKIN: Remove/take off immediately all contaminated clothing. Get immediate medical advice/attention. For minor skin contact, avoid spreading material on unaffected skin. Wash contaminated clothing before reuse.
- INGESTION: Never give anything by mouth to an unconscious person. Rinse mouth.

SAFETY DATA SHEET Product: MARC 142 STOMP INSECTICIDE

Form R04132

INHALATION: Remove person to fresh air and keep at rest in a position comfortable for breathing. Artificial respiration and/or oxygen if necessary. Do not apply mouth-to-mouth resuscitation. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Immediately consult a doctor/medical service.

MOST IMPORTANT SYMPTOMS/ EFFECTS. ACUTE & DELAYED:

ECTS, ACUTE & DELAYED:	INHALATION:	Prolonged exposure: danger of damage to health through inhalation.	
	SKIN:	Dermatitis. Skin rash/inflammation. May cause an allergic skin reaction.	
	EYE:	Direct contact with the eyes is likely irritating.	
	INGESTION:	Swallowing the liquid may cause aspiration into the lungs with the risk of	
		chemical pneumonitis. Risk of lung edema.	

INDICATION OF IMMEDIATE MEDICAL

ATTENTION & SPECIAL TREATMENT NEEDED: Treat symptomatically. Keep watching the victim. Symptoms may be delayed.

SECTION 5: FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA:	Powder. Alcohol-resistant foam. Water fog. Carbon dioxide.	
UNSUITABLE EXTINGUISHING MEDIA:	Do not use water jet as an extinguisher, as this may cause the fire to spread.	
FIRE-FIGHTING EQUIPMENT/ INSTRUCTIONS:	In case of fire and/or explosion, do not breathe fumes. Move containers away from the fire area if can be done without risk. NEVER direct water jet on liquid. Use water spray or fog for cooling exposed containers. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out. Some of these materials, if spilled, may evaporate leaving a flammable residue.	
UNUSUAL FIRE AND EXPLOSION HAZARDS:	Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.	
HAZARDOUS DECOMPOSITION PRODUCTS:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.	
SECTION 6: ACCIDENTAL RELEASE MEASURES		

EMERGENCY PROCEDURES/ PROTECTIVE EQUIPMENT: Evacuate unnecessary personnel. Consider initial downwind evacuation for at least 500 meters (1/3 mile). Stay upwind/keep distance from source. Gas is denser than air. May accumulate in low areas e.g. close to the ground. Vapors are heavier than air and may travel considerable distance to an ignition source and flash back to source of vapors.

Do not enter without appropriate protective equipment. Do not breathe gas/vapor. DO NOT touch spilled material. Fully encapsulating, vapor protective clothing should be worn for spills and leaks with no fire. Ventilate the area thoroughly, especially low lying areas (basements, work pits, etc.). Advise local authorities if considered necessary. (See Section 8.)

METHODS AND MATERIALS FOR CONTAINMENT AND CLEANUP: Eliminate every possible source of ignition. NO open flames, NO sparks, and NO smoking. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Form with air vapors (heavier than air) who stay on the floor. Gas is denser than air. May accumulate in low areas e.g. close to the ground. This material is classified as a water pollutant under the Clean Water Act and should be prevented from contaminating soil or from entering sewage and drainage systems which lead to waterways. Stop leak if safe to do so. Turn leaking containers leak-side up to prevent the escape of liquid. Move the cylinder to a safe and open area if the leak is irreparable. Use water spray to disperse the vapors. Isolate area until gas has dispersed.

Following product recovery, flush area with water. Clean thoroughly. Dispose as hazardous waste. Refer to Section 13.

ENVIRONMENTAL PRECAUTIONS:	Avoid release to the environment. Do not contaminate water with the product or its container.	
	Do not allow to enter drains or water courses.	

SECTION 7: HANDLING AND STORAGE

PRECAUTIONS FOR SAFE HANDLING:

Vapors may form explosive mixture with air. Exclude sources of heat, sparks and open flame. Pressurized container. Do not pierce or burn even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while handling product. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. Use explosion-free electrical equipment with earth. Do not re-use empty containers. Obtain special instructions before use. Reduce/avoid exposure and/or contact. Do not breathe gas/vapor/aerosol. Avoid contact with skin, eyes and clothing. Avoid prolonged and repeated contact with skin. Use only outdoors or in a well-ventilated

area. Wear recommended personal protective equipment as required. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

OTHER PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN! CONTENTS UNDER PRESSURE!

STORAGE: Store locked up in a cool place. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122°F. Do not puncture, incinerator or crush. Keep away from heat, hot surfaces, sparks, open flames and other sources of ignition. No smoking. Proper grounding procedures to avoid static electricity should be followed. Store away from incompatible materials (see Section 10 of SDS). Aerosol 3.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

CARBON DIOXIDE, LIQUEFIED, UNDER PRESSURE (124-38-9)

average
ue; TLV –
JE, TL

APPROPRIATE ENGINEERING CONTROLS/ VENTILATION:

VENTILATION: Provide sufficient air exchange and/or exhaust. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Ensure adequate ventilation, especially in confined areas.

RESPIRATORY PROTECTION: If permissible levels are exceeded use NIOSH mechanical filter/organic vapor cartridge or an air-supplied respirator.

EYE/FACE PROTECTION: Avoid contact with eyes. Wear face shield.

SKIN PROTECTION/PROTECTIVE GLOVES: In case of repeated or prolonged contact wear appropriate gloves.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Avoid contact with skin. Wear chemical protective equipment that is specifically recommended by the manufacturer. Use of an impervious apron is recommended. It may provide little or no thermal protection.

THERMAL HAZARD PROTECTION: Use appropriate personal protective equipment when risk assessment indicates this is necessary

WORK HYGIENIC PRACTICES: When using, do not smoke. Avoid contact with eyes and skin. Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking and when leaving work. Contaminated work clothing should not be allowed out of workplace. Take off contaminated clothing and wash before reuse.
